and be good environmental stewards.  
Act with integrity and professionalism with  
our employees, clients, and vendors.

## *Vision*

To make quality Pest Control Services available  
to all, by operating with integrity, effectiveness  
and customer-centric approach,  
with good value for money.

# COMPANY PROFILE

Dfortune Pest Solutions Ltd services are first and reliable defense against Pest for Residences and Businesses in major cities in Nigeria.

We are a Pest Control company that specializes in constantly working to developing pest solutions for our clients all over the country. Our specialty is in protecting your property before pest becomes an issue.

DFORTUNE Pest-Solutions Limited is a fumigation and pest control company registered by the Corporate Affairs Commissions to do business in Nigeria. We are expert in modern Pest Control Services; our specialization is in creating Integrated Pest management Program for organizations and Integrated Vector Management for Governments and the Public service. We are the foremost Pest control company in Nigeria with a customer-centric approach in the way we handle our business.

DFORTUNE Pest-Solutions Ltd is licensed by reputable government agencies which includes; Environmental Health Officers' Registration Council of Nigeria (EHORECON), Pest Control Association of Nigeria (PECAN), Lagos State Environmental Protection Agency (LASEPA), Abuja Municipal Area Council (AMAC), Ogun State Environmental Protection Agency (OG EPA), and many other State and Local Government Environmental Health Authorities. We are also licensed by the Department of Petroleum Resources (DPR) to work on off-shore platforms and vessels. (Please view all licenses below)

Your **FIRST CHOICE** in Pest Control Management

Dfortune employs the best pest control solutions that are at par with the leading pest control companies in Nigeria -**minus the price**, we offer great value for money because we understand that we should match your hard earned money with the best services available.

Our approach is data driven, we partner with property and business owners, and Government agencies to efficiently deploy Total Quality Management (TQM) for continuous improvement and Integrated Pest Management (IPM), Integrated Vector Management (IVM) for sustainable and participative pest management.

Your **FIRST CHOICE** in Safety.

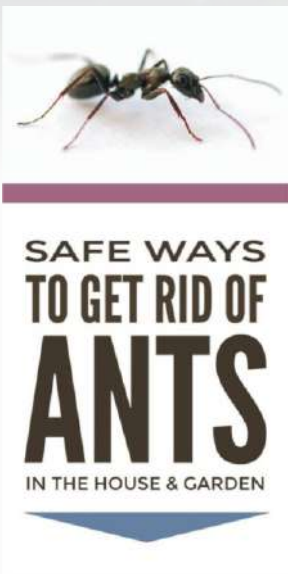

Safety is our number one priority for our clients and employees. Every product we use, are environmental friendly. We have a team of personnel that are highly trained in handling and using insecticides which are usually in the bounds of *human and animal safety standards*.

## GENERAL PESTS CONTROL

Is the regulation or management of a species defined as a pest, a member of the animal kingdom that impacts adversely on human activities. The human response depends on the importance of the damage done, and will range from tolerance, through deterrence and management, to attempts to completely eradicate the pest.

## GARDENING AND LANDSCAPING

We do landscaping, grounds-keeping and gardening, we do pretty much anything that involves a yard: raking, mowing, trimming, planting, digging, mulching and all sorts of other fun things.

Our job is to make every yard we touch as pretty as the cover of Better Homes and Garden.

CONTROL**

# DISINFECTION & DECONTAMINATION SERVICES

We offer this service as a form of preventive and/or curative measure, to rid a location of infectious diseases and pandemic like Lassa fever, Ebola, SARs, COVID-19 and any other related pandemic- caused by viruses or any other micro-organism, to prevent community spread. We carry out this service in commercial and residential centers.

COVID-19 DISINFECTION RESPONSE TEAM

## FUMIGATION (GAS ODORLESS)

Is a method of pest control that completely fills the target area with gaseous pesticides/ fumigants to suffocate or poison the pests within the area.

The space is sealed to the gas from escaping to areas that are not been treated.

## INTEGRATED VECTOR MANAGEMENT

Integrates Vector Management is a rational decision-making process for the optimal use of resources for vector control. The approach seeks to improve the efficacy, cost-effectiveness, ecological soundness and sustainability of disease-vector control.
